THE **#1** POS SOLUTION

Why use Resolut?

Resolut offers a great set of standard POS functionalities and processes which Bovertis collected over the past years at several European Airport Retailers. We will list a couple of them although we are not able to list every possible function.

All functions are parameterised and can be switched on or off depending on the specific situation or process. If you do not see your way of handling in this list, please do not hesitate to contact our sales office.

Feature list (for all features please contact us):

- Full registrations and (fraud) report of all events like sales, refunds, cash drawer open, interrupted transaction, sales slip copies.
- User authorization with pincode, barcode, RF-id or magnetic card swipe
- Multi price line
- Unlimited currencies, configuration per currency
- Unlimited and per type configurable payment types, free to add own gift-vouchers
- Unlimited stock items and unlimited number of barcodes per stock item
- Configurable barcodes to use own barcode labels with coded item numbers, price or weight / length. Sales price can be calculated on weight, length etc.
- Advanced discount programs with start-end dates, for example buy 3 pay 2, set price (buy 5 for 10 euro), gift items, item discount.
- Add-on barcodes (magazines and newspapers)
- Enterprise wide POS Management, all POS are connected through LAN/WAN.
- Online storages for transactions. The transaction is first locally saved and transferred in the background to the POS Management or back office server.
- Configurable export file layout for batch export, export in XML or peer-to-peer with your ERP / back office.
- Fully configurable with more then 100 parameters, menu and POS functions configurable, authorization can be set per function/user.
- Built-in Cash count with fraud protection and seal bag registration
- Optional time registration functions.
- Free format item search
- Fashion capabilities like size and color tables.
- Selling unknown articles, free input capabilities.
- Turn over statistics per pos, shop and employee (using Resolut POS Management)
- Loyalty programs
- Connection with kiosk
- Remote connections to POS database
- On-line connections through http or web services
- Automatic update features can be schedules per site and till
- Tailor-made plug-in modules for example interfaces with your stock / warehouse system

System requirements

Windows platform on Intel / AMD x86 with 128 Mb (256 or more recommended)
Hard disk 40GB or higher
OPOS (all versions) or WEPOS compatible peripherals, for other hardware, like EFT pin pads, plug-ins are available or can be developed.
10/100/1000 Mbps Network connection
